Summary

Computer Science student with hands-on experience designing web, mobile, and dashboard interfaces and collaborating on frontend implementation. Skilled in Figma, user flows, reusable UI components, prototyping, and design handoff, with a working foundation in JavaScript, TypeScript, and React. Interested in design systems, consistent UI patterns, and improving design workflows through tools and automation.

Skills

UI Design:	Wireframing, High-Fidelity Interface Design, Interaction Design, Interactive Prototyping, Visual Hierarchy, Responsive UI Design
Design Systems:	Figma Components, Component Variants, Auto Layout, Reusable UI Components, Design Consistency, Design Handoff
Workflow Tools:	Autoflow, Beautiful Shadows, Magician, FigR Identity V2, Mobbin, TypeBalance
UX Methods:	User Flows, Information Architecture, User Research, Usability Testing, Accessibility Principles
Frontend:	HTML5, CSS3, JavaScript, TypeScript, React.js, React Native
Other Tools:	FigJam, Notion, Framer Motion

Experience

Bizplus4u Dec 2025 – Feb 2026
UI/UX Design Intern

- Translated restaurant-management requirements for KytchenPulse into user flows and wireframes covering reservations, recipes, inventory, and menu operations.
- Designed high-fidelity dashboard screens and reusable Figma components, refining visual hierarchy, typography, and interaction patterns across workflows.
- Prepared design handoff materials and specifications for development, incorporating stakeholder feedback to align interface decisions with product requirements.

Design Projects

Qiskit Fall Fest 2026 – Event Website | *UI Design, Frontend Development* 2026

- Designed and implemented the Learning and Experiences pages, translating event content into structured layouts and clear navigation within a shared website codebase.
- Refined page-level consistency and collaborated through Git-based workflows to deliver changes while isolating unrelated sections from modifications.

SRM Sports Council Management System | *Dashboard UX, Design Systems* 2026

- Mapped student and administrator workflows for sports registration, club management, and slot booking, shaping role-specific navigation and interface structures.
- Designed reusable dashboard components and consistent interaction patterns, collaborating on implementation to align interface decisions with application workflows.

UniRide – Student Ride-Pooling App | *Figma, UX Research, Interaction Design* 2026

- Designed ride discovery, booking, and coordination flows through user journeys, wireframes, high-fidelity screens, and interactive prototypes.
- Tested the experience with eight student users and refined navigation and task flows based on observed usability issues and feedback.

Education

SRM University AP 2023 – 2027
B.Tech in Computer Science and Engineering (CGPA: 8.21/10.0)

Certifications

Complete Figma Megacourse: UI/UX Design Beginner to Expert – Udemy, Aug 2026
Google UX Design Certificate – Coursera (In Progress)
